

Scenario - Activity 1: Waste Walk and AI Opportunity Scan

Orion Precision Components has rising lead time in a CNC-inspection-packaging value stream. Learners use 30 observation records to distinguish facts, waste symptoms and candidate AI support.

Questions

1. Which three wastes contribute most to delay?
2. What evidence is still missing before causal analysis?
3. Which countermeasure should be tried before AI?
4. What decision could AI support, and who owns it?

Known facts versus assumptions

Statement	Fact / calculation / report / assumption	Evidence source	Confidence
