

Activity 9: Grounded GenAI for Standard Work

Level: Advanced Duration: 60 minutes Mapping: K8 A6 Tools: Prompt worksheet; source register; review checklist

Goal

Design prompts, retrieval boundaries and review controls that keep generated standard work grounded and safe.

Learner output

Grounded prompt, source hierarchy, draft instruction, reviewer checklist and controlled-release workflow.

Files in this folder

- README.md / README.pdf - activity guide and detailed procedure
- scenario.md / scenario.pdf - case facts and questions
- worksheet.md / worksheet.pdf - structured response template
- evidence-checklist.md / evidence-checklist.pdf - acceptance record
- data.csv - mock dataset when analysis is required

Detailed procedure

1. Define the user, decision and prohibited uses of the copilot.
2. Rank approved sources by authority and version status.
3. Write a prompt that requires retrieval citations, uncertainty and refusal when evidence is absent.
4. Generate or manually draft a short troubleshooting response using only the source excerpts in source-pack.md.
5. Check every technical value and step against the cited source.
6. Remove unsupported content and add safety prerequisites.
7. Route the draft to the authorised engineer and document changes.
8. Release only the approved version and record review date and next review trigger.

Verification

Complete every acceptance item in evidence-checklist.md. Submit the worksheet plus calculations, exported tool output or screenshots named in the worksheet.

Safety, privacy and responsible AI

Use only the supplied scenario data unless your organisation has authorised another dataset. Remove personal, confidential and export-controlled information. AI outputs are suggestions until verified by the named human decision owner.
